Key Features & Benefits

PowerWash
Unmatched Cleaning Performance, Everywhere With 2x wider coverage and up to 5x better cleaning*, this advanced spray arm technology delivers exceptional results by combining superior coverage and deep-cleaning power while maintaining efficiency and precision

Flexible Third Rack
The flexible 3rd rack goes beyond cutlery, offering adjustable sections and removable trays to fit everything from espresso cups to long utensils while still allowing space for tall wine glasses in the upper basket. With height adjustable racks for added versatility, you get convenient loading and increased cleaning space.

Self Clean Filter
Self Clean filter keeps your dishwasher's filter clean up to four times longer to help maintain the quality of each cycle's wash. A special sprinkler system is built inside the filter which moves in a circular motion to clean the filter's interior.

SelfDry
At the end of the cycle, the door automatically opens to release excess moisture and bring in fresh air for more effective drying. This natural airflow helps deliver drier dishes while reducing energy use.
