In Harmony with Nature

Blomberg believes your home should be as smart as you are, in every sense of the word. That includes performing flawlessly while protecting the planet. It’s a philosophy that earned us the ENERGY STAR® 2017 Partner of the Year Award. All Blomberg dishwashers are ENERGY STAR certified for using advanced technology to clean your dishes brilliantly with less water and energy. Unique design features include multiple insulation layers to reduce thermal loss and a variable speed circulation motor that automatically adjusts for optimum water and energy consumption.

In Harmony with Your Life

Silent Operation

When your home is your sanctuary, you don’t want to have to leave the room or only run the dishwasher late at night. Quality engineered with three layers of noise-suppressing insulation and advanced Brushless DC™ motor technology that optimizes working speed and lowers wash-cycle noise, Blomberg dishwashers are among the quietest on the market.

Flexible Rack Loading

Designed for ultimate convenience, Blomberg dishwashers accommodate all types of dishes, cutlery, and cookware comfortably. Flexible racks, shelves, and baskets can be moved, reconfigured, or customized to meet your exact needs for each load.

Height-adjustable Upper Rack

When the need arises, this hard-working rack can be raised to make room for pans, platters, and trays in the bottom rack or lowered to accommodate tall glasses up top.

Sized Right

Blomberg dishwashers are designed for today’s lifestyles, including generously proportioned racks that accommodate dinner plates up to 13 inches in diameter, as well as oversized serving dishes, your favorite cooking pots, and lots of glassware.

Sliding Cutlery Basket

Everything fits more easily when you have options. This clever cutlery basket can be placed anywhere in the front row by sliding side to side.

Split Flip Shelves

Maximize space, capacity, and versatility in the upper rack by flipping these smart side shelves up or down. Leave them in the up position to wash tall glasses. Flip them down to wash long utensils and espresso cups at the same time. Or do both. These special shelves are split. Flip one half down to wash two levels of short brandy glasses and leave the other half up to fit champagne flutes.
